

Hyde Developments products offer the maximum amount of protection available today by resisting impact to the most vulnerable areas of the engine, frame and pipe. It also protects the pipe from roots and flying debris. Custom designed and fitted for each individual model.

Hyde Developments products offer:

- Light weight and neat, easy fitment
- Minimal loss of ground clearance
- Offers maximum protection
- Does not hold heat
- Weighs less than half as much as alloy
- Will not corrode, discolor, bend or crack
- Impact absorption qualities are far superior to that of alloy
- Engine runs cooler than with alloy plate
- Reduced noise compared to an alloy plate
- Easy removal for cleaning and maintenance
- Sleek factory look
- Inexpensive and affordable

What about Carbon Fibre or Standard Plastic?

Carbon fibre, as well as the standard plastic plates that some bikes are coming out with nowadays, are extremely brittle - they crack easily and don't offer much protection at all. Carbon fibre is used effectively on F1 cars for example, because it shatters on impact and is less dangerous to the driver in an accident.

BUT it is not going to protect the bottom of a bike against our rough Australian terrain!

Hyde Developments products are made from Teflon/Co-Polymer

- Abrasion resistant
- Absorbs sound instead of reflecting it up as do aluminum plates
- Form fitting front portion means:
 - Rocks and mud will not accumulate under engine; no need for reticulated foam; and lower engine temperatures due to air being allowed to flow over clean engine underside
- Lightest amongst all comparable skid plates
- Satisfaction GUARANTEED

Hyde Developments products are the best looking skid plates on this planet.

Using an aluminum skid plate is like putting a Bug Deflector on a Corvette. Give your bike the best!

"We offer a conditional 12 month warranty on any Hyde Development plate. If you are not happy with the product return it to your place of purchase."

CLUTCH CASE COVERS

These clear heavy duty clutch case covers protect your expensive casings from damage from boots and crashes, and they look great! See catalogue for fitments available.

HEADLIGHT PROTECTORS FOR YAMAHA and KTM 2007

Trick looking moulded lens covers in high definition yellow or clear!

KTM250 EXC-F BASH PLATE AND PIPE GUARDS - KTM450, 525 EXC-F

This style of pipe guard and bash plate offers ultimate protection for expensive header pipes and cases. Lightweight, quiet, and sleek looking.

FRAME GUARDS

Offering unequalled coverage of your precious alloy frame and providing excellent base for sponsor logos as well.

SWING ARM PROTECTORS

Keep your Swing Arms looking brand new for excellent resale!

KTM

Hyde Developments skid plates are one third the weight of aluminum glide plates and offer a sleek factory look. Skid plates don't hold the heat and as a result there is no loss of horsepower. Bash plates offer superior impact absorption with almost no resonate noise. Their close fit picks up less mud.
